Subject: Highway Projects Submitted for ARRA Funding for the Milwaukee Urbanized Area

Milwaukee MPO Members and Staff

Enclosed is a listing of highway projects submitted for ARRA funding for the Milwaukee Urbanized Area that WisDOT engineering staff has determined to be eligible and with a high likelihood of timely delivery. From this list, which totals about \$218 million with engineering and contingencies included, the MPO has the important responsibility of selecting the projects that will utilize the remainder of the \$38.7 million made available to the urbanized area.

The number of projects submitted by local governments in your region and throughout the state clearly underscores the high degree of need that exists for transportation infrastructure investments. Because of these needs, Wisconsin will do all it can to insure we are able to access ARRA funding that will be made available through the redistribution process and ARRA discretionary programs. To accomplish this, it is critical that the projects selected at this point can be let to contract within the timelines required by ARRA. For this reason, WisDOT engineers have reviewed all the projects submitted by local governments and this list consists of those projects eligible for ARRA funding and with a high likelihood for delivery of plans by December 1, 2009 or before.

The projects highlighted in yellow at the top of the list, which total \$26.5 million with engineering and contingencies included, are projects that can begin construction during 2009, and include the three projects previously submitted for your consideration, but left on the table during Phase 1. The Governor and I strongly encourage you to include all eight 2009 construction year projects in the ARRA program for the urbanized area. The purpose of ARRA is to create jobs, and to create them quickly. Unfortunately, selection of these eight projects still leaves some ARRA funding unused until next construction season, meaning the creation of some jobs will be delayed. A decision to leave even one of these projects on the table will only make matters worse, and mean good paying jobs that can and should be created will go unrealized. This is unnecessary, and will hurt Wisconsin workers and their families by delaying much needed economic assistance during this time of increasing unemployment and economic distress. We feel this is unacceptable and that the public deserves the best efforts of all levels of government to put ARRA funding to work as quickly as possible.

Also enclosed is a listing of Transportation Enhancement projects which were submitted from the Milwaukee Urbanized Area for consideration in the statewide TE project selection process. This list represents all projects that were submitted, and has not yet been closely screened for eligibility and deliverability. A separate group of state agency officials and citizens will be meeting in the near future to screen and evaluate all TE projects. The MPO rankings of projects within the Urbanized Area are a necessary part of that statewide review.

In order to ensure that all these projects can meet the critical deadlines required to allow bids to be let and construction to start in 2009, we ask you to provide with your prioritized rankings to Bob Schmidt, WisDOT Local Program Manager in the Southeast Region by Monday, May 4, 2009.
