I. INTRODUCTION

The Public Transit – Human Services Transportation Coordination Plan for Milwaukee County: 2016, hereafter referred to as the Coordination Plan, is intended to provide a framework to assist community leaders, human services agencies, and public transit agencies in improving public transit and human services transportation in Milwaukee County and the County’s connections to the Southeastern Wisconsin Region. The Coordination Plan assesses the existing public transit and human services transportation services and needs in the County, identifies unmet needs or service gaps, and presents a prioritized list of strategies to address those needs. By focusing on coordination strategies that use existing resources, the Coordination Plan aims to improve the access of County residents to transportation in a cost-effective manner.

Federal and State Coordination Planning Requirements

The coordination planning process was first undertaken in 2008 in response to the Federal requirements in the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The Coordination Plan was renewed and updated in 2012 under the requirements of the Moving Ahead for Progress in the 21st Century Act (MAP-21), and has now been updated under the requirements of the Fixing America’s Surface Transportation Act (FAST Act). All three Federal transportation acts have required that a locally-developed public transit-human services coordination plan be developed every four years. The FAST Act mandates that projects selected for funding under the Enhanced Mobility of Seniors and Individuals with Disabilities program (Section 5310) be included in the coordinated planning process.

Under the provisions of the FAST Act, project eligibility for the Section 5310 program includes the purchase of specialized transit vehicles used to serve seniors and people with disabilities, mobility management, non-vehicle capital purchases, operating expenses for transportation projects that exceed the requirements of the Americans with Disabilities Act of 1990 (ADA), improving access to fixed route transit service to decrease reliance by people with disabilities on complementary paratransit, and providing alternatives to public transportation that assist seniors and people with disabilities. In addition, though not required by the FAST Act, the Wisconsin Department of Transportation utilizes the Coordination Plans to determine project eligibility for Wisconsin Employment Transportation Assistance Program (WETAP) funding.

Several agencies and organizations in Milwaukee County have received funding under the Section 5310 and WETAP programs in the past. The Coordination Plan will help ensure the eligibility of current and future transit projects funded through those programs. The Coordination Plan includes the following elements required under Federal regulations.

- An assessment of transportation needs for seniors, people with disabilities, and people with low incomes;
- An assessment of available transportation services;
- Strategies to address the identified gaps between current services and needs, as well as opportunities to improve efficiencies in service delivery; and
- Priorities for implementing these strategies.
Role of the Southeastern Wisconsin Regional Planning Commission
The Commission staff, at the request of WisDOT, and with guidance and input from human services agencies and public and private transit operators in each county, has facilitated the planning process and prepared the maps, tables, and inventories for the Coordination Plans for each of the seven counties in the Region. For the Milwaukee County Coordination Plan, Commission staff invited a wide range of stakeholders from Milwaukee County and the Region to a meeting to identify the unmet transportation needs in the Region and in each of the seven counties, and develop strategies to address these needs. The invitation list, meeting record, and attendance list for this meeting are documented in Appendices A and B.

In addition to this Coordination Plan, the Commission also periodically prepares the long-range (20-35 year) transportation system plan for the seven-county Southeastern Wisconsin Region and short-range (5 year) transit development plans for each of the Region’s public transit systems. The year 2050 regional land use and transportation plan for Southeastern Wisconsin (VISION 2050), adopted in 2016, is intended to provide a vision for, and guide to, future transportation system development in the Region. The short-range transit service plans address current transit service issues and needs, and represent an initial stage of implementation of the recommendations of VISION 2050. A transit system development plan for the Milwaukee County Transit System (MCTS) was prepared in 2010 and provided a five-year plan for transit service improvement and expansion. The plan evaluated the existing operations of MCTS; identified unmet transit travel needs for Milwaukee County residents, and recommended transit service and capital improvements for the County transit system should funding become available.

II. TRANSPORTATION NEEDS OF SENIORS, PEOPLE WITH DISABILITIES, AND PEOPLE WITH LOW INCOMES

General Population Characteristics
Milwaukee County is located along Lake Michigan, in southeastern Wisconsin, and is bordered by Waukesha County to the west, Racine County to the south, Lake Michigan to the east, and Ozaukee County to the north. The County is mostly urban but has some rural and undeveloped areas in the southern portion of the County; in the Cities of Oak Creek and Franklin. Milwaukee County’s population in 2015 was 957,700, according to the U.S. Census Bureau. Of that total, the population of the City of Milwaukee made up 600,200, or about 63 percent. Map 1 shows the population density in 2010 by U.S. Public Land Survey quarter-section.

Between 1990 and 2000, the Milwaukee County population declined by 2.0 percent from approximately 959,300 to 940,200 persons, respectively. Following that decline, slow growth has occurred since 2000 and is expected to accelerate through 2030. As Figure 1 displays, the Milwaukee County population is projected to grow to 998,900 by the year 2030.
Transit-Dependent Population Characteristics
Certain segments of the population may be expected to have a greater dependence on, and make more extensive use of, public transit than the population as a whole because they have historically had more limited access to the automobile as a mode of travel than the population in general. Four such “transit-dependent” population groups were identified for this plan:

- Seniors (aged 75 and older),
- Persons in low-income households,
- People with disabilities, and
- Households with no vehicle available.

Table 1 displays the historic population of these groups in the study area in 2000, 2010, and 2015. The information in the table leads to the following observations:

- In 2015, persons in low-income households accounted for the largest share of the transit-dependent population in the County at about 40 percent of the total population. People with disabilities also make up a significant portion of the population (12 percent), and households with no vehicle available accounted for about 14 percent of all households in 2015. Seniors are the smallest transit-dependent population group at approximately 6 percent of the County’s population.

- Between 2000 and 2015, people with disabilities and persons in low-income households increased in absolute number and in the share of the total population. Seniors and zero-auto households have decreased both in absolute numbers and in their percent of total population and households, respectively.

Data from the 2011-2014 American Community Survey were used to identify areas in Milwaukee County where transit needs are highest. Map 2 displays Census block groups within the County with the highest concentration of
transit-dependent populations. These may be considered as potential priority areas for the provision of transit service.

In 2014, residential populations with transit needs were spread through much of the county, with the highest transit-dependent population concentrations in the north-central, south central, and northwest parts of the County.

Employment Characteristics
Map 3 displays employment density in 2010 by U. S. Public Land Survey quarter-section. The highest employment concentrations in the County are in the center of the City of Milwaukee, including the central business district. Significant portions of the county have high employment density, with only the southern quarter of the County being sparsely developed.

Major Activity Centers
Transportation needs must also consider the local travel demand generated by major activity centers. Major activity centers can be land uses or facilities that currently attract, or have the potential to attract, significant total person or transit person trips. Eight types of major activity centers were considered for this Coordination Plan:

- Hospitals, Medical Centers, or Clinics with 10 or more physicians
- Job Resource Centers
- Major Commercial Areas (areas with more than 3,500 jobs in the office or service sectors, or more than 2,000 jobs in the retail trade sector)
- Major Employers with 100 or More Employees
- Major Institutions of Higher Education (the main campus of all traditional four-year colleges and universities, and the main location of public technical colleges)
- Nursing Homes

*a An individual, such as someone who is a senior and lives in a low-income household, may be represented in more than one population group.

*b Includes persons residing in households with a total family income less than 200 percent of the Federal poverty level.

*c The definition of “people with disabilities” used by the U.S. Census Bureau for the 2000 census changed for the 2010 Census and 2015 American Community Survey (ACS). For the 2000 Census, “people with disabilities” included those persons age 16 and older having a physical, mental, or emotional condition that made it difficult to go outside the home to shop or visit a doctor’s office. For the 2010 Census and 2015 ACS, “people with disabilities” included those persons age 15 or older who had serious difficulty living independently or a serious sensory, cognitive, or ambulatory disability.

Source: U.S. Census Bureau and SEWRPC
NOTE: THE TRANSIT NEEDS INDEX IS CALCULATED BY RANKING CENSUS BLOCK GROUPS BASED ON THE DENSITY OF POPULATION OR HOUSEHOLDS WITHIN FOUR CATEGORIES: SENIORS (75 AND OLDER), PERSONS IN LOW-INCOME HOUSEHOLDS, PEOPLE WITH DISABILITIES, AND HOUSEHOLDS WITH NO VEHICLE AVAILABLE. EACH RANKED BLOCK GROUP IS ASSIGNED A SCORE FROM 1 TO 4, BASED ON THE QUARTILE THE BLOCK GROUP FALLS WITHIN FOR EACH CATEGORY, WITH A 1 FOR THE LOWEST DENSITIES AND A 4 FOR THE HIGHEST DENSITIES. THE TRANSIT NEEDS INDEX IS EQUAL TO THE SUM OF THE SCORES FOR ALL FOUR CATEGORIES.
• Residential Facilities for Seniors, People with Disabilities, and Low-Income Households
• Senior Centers, Senior Meal Sites, and Adult Day Centers

Map 4 shows their locations. There is a high concentration of these facilities in close proximity to the City of Milwaukee central business district, with many major employers, residential facilities, and commercial areas also located throughout the County. It is important to note that people with disabilities reside throughout Milwaukee County and many live independently, not just in special housing facilities.

III. CURRENT TRANSPORTATION SERVICES

Milwaukee County is served by a number of transportation providers, ranging in size from the Milwaukee County Transit System (MCTS), a traditional urban public transit system with large buses operating over fixed routes, to volunteer organizations that serve individuals by providing rides in private automobiles.

Table 2 lists the major transportation providers currently serving Milwaukee County, and identifies the type of service they provide, their service area, their hours of operation, and their funding sources in addition to passenger fares. The first section of the table lists services that are open to the general public, while the second section lists services intended to serve a particular part of the population including seniors, people with disabilities, low-income persons, or veterans. These services are generally called “human services transportation.”

Transit Services for the General Public
The principal transit services for the general public provided in Milwaukee County include:

• MCTS, operated by Milwaukee County, is a publicly-funded urban bus operation that runs fixed routes serving Milwaukee County and portions of adjacent counties. MCTS also provides paratransit service to serve the travel needs of people with disabilities through the Transit Plus paratransit system.

• The Ozaukee County Express—operated by MCTS, under contract with Ozaukee County—is a publicly-funded bus service that serves Ozaukee County residents commuting to jobs in the Milwaukee Central Business District and Milwaukee County residents commuting to jobs in Ozaukee County.

• The Washington County Commuter Express—operated by a private transit company, Go Riteway Transportation Group, Inc., under contract with Washington County—is a publicly-funded bus service that serves Washington County residents commuting to jobs in the Milwaukee Central Business District.

• Waukesha County Transit System provides a publicly-funded bus service primarily to serve persons commuting between Waukesha and Milwaukee Counties. The County contracts with one public transit operator, MCTS, and one private transit company, Wisconsin Coach Lines, Inc., to operate the bus services connecting Milwaukee County and Waukesha County.
MAJOR ACTIVITY CENTERS

- HOSPITALS, MEDICAL CENTERS, OR CLINICS WITH 10 OR MORE PHYSICIANS
- JOB RESOURCE CENTERS
- NURSING HOMES
- MAJOR INSTITUTIONS OF HIGHER EDUCATION
- RESIDENTIAL FACILITIES FOR SENIORS, PEOPLE WITH DISABILITIES, AND LOW-INCOME HOUSEHOLDS
- SENIOR CENTERS, SENIOR MEAL SITES, AND ADULT DAY CENTERS
- MAJOR EMPLOYERS WITH MORE THAN 100 EMPLOYEES

Source: SEWRPC
• Wisconsin Coach Lines, Inc. operates one publicly-funded route which provides commuter-oriented express bus service between downtown Milwaukee and the Cities of Racine and Kenosha. The City of Racine contracts for the service and acts as the public applicant and grantee for the State urban transit operating assistance funds used to subsidize the service.

Several private-for-profit companies serve the general public in Milwaukee County, including taxicab service and airport shuttle or limousine service provided by several private companies, and transportation network companies such as Uber or Lyft. In addition, several transportation companies provide intercity rail or bus services to the general public, including Amtrak, Coach USA, and Greyhound Lines.

**Human Services Transportation**

Other transportation services in the County are primarily aimed at serving the human services transportation needs of special population groups, including seniors, people with disabilities, low-income persons, or veterans. Some of the major human services transportation providers include:

• The Milwaukee Area JobRide Collaborative provides transportation to and from jobs on a subscription basis for the employees of participating employers.

• The Milwaukee County Department on Aging provides three types of door-to-door transportation services – group transportation services, meal site transportation services, and individualized transportation services – for ambulatory seniors who are unable to provide their own transportation, or use the County’s TransitPlus paratransit or fixed-route bus services.

• There are several other private-non-profit organizations that provide transportation to individuals that participate in their programs or attend activities or appointments at their centers.

• The remaining transportation services operated within the County are private-for-profit services that mostly focus on providing transportation for medical appointments within Milwaukee County and to surrounding counties.

**IV. ASSESSMENT OF TRANSPORTATION SERVICES AND IDENTIFICATION OF UNMET TRANSPORTATION NEEDS**

Although some transportation needs can be understood by examining how current transportation providers meet the needs identified in Census data, maps, and other sources of demographic data, many of the needs can only be understood through direct dialogue and communication from agencies and individuals that provide or rely on transportation services. A wide range of individuals and agencies with an interest in transportation in the Region and County were invited to participate in a meeting to assist in the development of the Coordination Plan (see Appendices A and B). At the meeting, Commission staff presented maps and data similar to those presented in the first three sections of this Coordination Plan. The meeting included participants from across the Region who were divided into sixteen small groups of six to eight people each. Groups were initially assigned so that participants sat at a table with other attendees from the same county. Participants were then assigned to a new group that had members from multiple counties in the Region.
The small groups went through an evaluation exercise in which they assessed how well current transportation services meet the need of residents to travel within Milwaukee County. This evaluation of existing services was based on: area served; days and hours of operation; fares; eligibility requirements for the service; vehicle accessibility for wheelchairs; customer service; reservation wait time; and ease of finding information on services. Following this task, they were asked to use the results of their assessment to guide the development of a list of unmet transportation needs. A summary of the key findings of the assessment and the identification of unmet transportation needs for traveling within Milwaukee County appears below in no particular order.

**Unmet Needs for Travel within Milwaukee County**

- There is a need for State approval of dedicated local funding for transit and increased funding for transit from the State. In recent years, there has been a lack of a dedicated funding source separate from the property tax levy to provide the level of financial assistance necessary to address existing and future public transportation needs in the County. Additionally, State and Federal funding, which provides the majority of subsidy for transit services, has been decreasing. All of these funding limitations have placed significant pressure on the County transit system.

- Need for improving coordination and communications.
  - Lack of communication among transportation providers.
  - Lack of coordination in the distribution of information on the available transportation services. There is no directory or single point of contact that can provide the public with comprehensive information on all available transportation options.
  - Need more convenient ways for users to obtain information on available transportation services.
  - Lack of public education on the available transportation options, including how to use them.
  - Need an increased focus on communication with the clients who use transit services to identify opportunities for improving these services.

- Need for improving the availability, convenience, safety, and security of using existing public transit services. Areas of need include:
  - Higher frequency of service for MCTS routes and human service providers to reduce wait times.
  - Reducing reservation times for human services providers to be less than 48 hours.
  - More signage in braille at bus stops for travel information and passenger announcements.
  - More accessible bus stops (e.g. curb cuts, sidewalks) and more transit amenities (e.g. shelters and benches at bus stops).
  - Clearing snow and ice from MCTS bus stops and sidewalks.
  - Expanding the service areas of transit and human services providers, especially to the Cities of Franklin and Oak Creek.
  - Ensuring services provided by public transit, human services providers, Amtrak, and transportation network companies such as Uber and Lyft are all wheelchair accessible.
Improving transportation accommodations for bariatric clients.

Improving customer service and driver education relating to awareness of people with disabilities.

There is a need for better transit connections between where low-income residents live and jobs in the County. Transit routes should be established that decrease the amount of travel time to reach employment opportunities.

Lack of robust transportation services at all times in the County.

Need for a higher speed transit service in the County. Transit travel times are generally two to four times longer than automobile travel times.

Need more transportation services during weekday evenings and nights.

Weekend service frequency needs to be improved.

Need more routes to be available 24 hours per day, seven days a week.

Need more transit options for underserved areas.

Need more transportation services to senior living facilities and for non-medical activities.

Need for more Title 19 medical transportation service providers that serve the entire county and higher reimbursement rates to encourage more service to be provided.

Need for more advocacy for making improvements in transportation policy.

Need to increase the affordability of transit and human services providers for low-income individuals and families.

The meeting also addressed travel needs between the counties in the Region. For this discussion, the second set of small groups with participants from multiple counties performed a similar assessment of how well current regional services meet the needs of residents. Using the results of their assessments, the groups then created a list of unmet regional transportation needs. A summary of the key findings of the regional assessment and the identification of unmet regional transportation needs appears below in no particular order.

Unmet Needs for Travel between Counties

Lack of a regional transit authority to provide and coordinate transit and paratransit services across county borders.

Transportation Options

Limited transportation options between counties—especially for seniors, people with disabilities, low-income residents, and households with no vehicle available—for travel to jobs, medical facilities, veterans services, and social and recreational activities.

Need to enable more transportation services to provide inter-county and interstate transit options in the Region.

Lack of transportation services for travel from suburb to suburb.

Coordination and Communication

Lack of coordination in the distribution of information related to existing services throughout the Region.
- Lack of coordination between transit agencies on fares, service hours, and days of operation, which causes inconveniences for transit users.
- Lack of coordination between paratransit services in the Region.
- Lack of coordination among county leaders on providing public transit and human services transportation across the Region.
- Lack of transit operations that provide bilingual services.
- Need for identifying additional opportunities for gathering citizen input on regional transportation.
- Need to include grassroots efforts in decision-making processes relating to transit communications that cross county lines.

**Transit and Job Access**
- Need to increase public transit and other transit services that connect workers to jobs between counties.
- Need for job seekers to be informed about job-ride programs that would connect them to jobs in other counties.

**Convenience of Transit**
- Need to make transit services between counties more affordable by reducing fares.
- Need to make transit services more convenient by increasing the frequency of transit services or reducing the amount of time needed for making reservations.
- Lack of regional partnerships among healthcare providers to reduce fares for rides to medical facilities in the Region.
- Lack of transit services during evening and weekend hours.
- Need for all transportation services, including Uber and Lyft, to be accessible to people with disabilities.

**Additional Needs**
- There is a need to broaden the categories of individuals who are eligible to use human services transportation.
- There is a need to remove stipulations that make it difficult for transit providers to obtain liability insurance for trips that cross county borders.
V. STRATEGIES TO ADDRESS UNMET NEEDS

This Coordination Plan presents two types of strategies for Milwaukee County to consider in addressing the identified transportation needs in the County. The first section is a list of Federal and State funding programs that support public transportation services. The second section includes strategies that were identified by participants at the meeting for the development of the Coordination Plan.

Financial Strategies: Federal and State Funding Programs
Descriptions of the Federal and State programs that provide financial assistance for public transportation services and which could be used in Milwaukee County are illustrated in Tables 3 and 4. More information on Federal and State funding programs can be found on WisDOT’s website (http://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/transit/default.aspx). In addition to the Federal and State programs shown in Tables 3 and 4, which are aimed primarily at providing transportation services, various human-service funding programs and block grant programs can be used for transportation services.

Prioritized Strategies to Address Unmet Needs
Attendees of the Coordination Planning meeting were asked to develop strategies to address the unmet needs that they had already identified. At the meeting, Commission staff provided information on strategies proposed in the 2012 Coordination Plans to illustrate potential strategies to improve transportation service.

The small groups of participants from within the same county were asked to follow up their identification of unmet needs with a list of strategies to address those needs. That discussion resulted in the following prioritized list of strategies that the participants believed were appropriate for Milwaukee County.

Strategies for Addressing Unmet Travel Needs within Milwaukee County

1. Create new or expand upon existing partnerships with municipal governments and human services providers to provide more transit options to currently underserved areas in the County.

2. Pursue dedicated and sustainable sources of funding for public transportation services from all levels of government. Promote increases for public transportation services to make improvements to service availability, convenience, safety, and lower fares. Continue to develop strategies to obtain funding for projects that would improve or increase the transportation services available in the County.

3. Improve access to information on the available transportation services. Some ways to improve the dissemination of information and determination of eligibility requirements include:
   a. Support and expand travel training programs for potential users of transportation services relating to available services and information on free or reduced fares.
   b. Develop a coordinated call center that provides information on all transportation services within the County. This centralized source for information could also include 211 community information or 511 traveler information services.
   c. Create an online directory of transportation providers.
4. Pursue a greater reimbursement rate for medical transportation services from State and Federal governments.

5. Support community planning by local governments within the County that integrates public transit routes and stops into new residential and commercial developments.

6. Improve the availability, convenience, safety, and security of transportation services. Some of the improvements that were identified include:

a. Extend the service area and days and hours of operation for transportation services.

b. Provide more frequent service on MCTS bus routes.

c. Provide customer service training to bus drivers, human services providers, and taxi cab drivers to better meet the needs of users of these services.

d. Improve the accessibility of transportation services to seniors and people with disabilities by using more accessible vehicles, removing physical barriers that impede access to transportation, and making accessibility improvements at bus stops.

e. Support bus rapid transit and other express transit services that reduce transit travel time.

Source: Wisconsin Department of Transportation and SEWRPC
f. Improve snow removal at bus stops and at nearby sidewalks and pedestrian crossings. Establish ‘adopt-a-stop’ programs for maintenance and snow removal at bus stops.

g. Support the implementation of ‘complete streets’ concepts into road design and construction related to infrastructure that provides safe and convenient travel for all roadway users, including transit users, bicyclists, and pedestrians.

h. Support and maintain an automated bus stop announcement system.

i. Include signage in braille at bus stops for travel information and passenger announcements.

7. Analyze transit routes to identify current gaps in transit service and areas not served by public bus routes. Transit agencies should implement new routes or modify existing routes to address these gaps and underserved areas. Transit agencies should also identify changes to routes that would improve connections for seniors and other transit users to medical facilities, jobs, and other essential services.

8. Prioritize investment in new or expanded routes and in service improvements to provide seniors, people with disabilities, and low-
income residents of the County with better access to employment opportunities, medical facilities, and social activities.

9. Expand reverse commute bus services for connecting low-income people within the County to jobs in other counties.

10. Continue to fund a mobility manager position with MCTS or the County whose duties could include, but would not be limited to:
   a. Assisting in coordinating transportation services.
   b. Promoting the availability of transportation services.
   c. Gathering and analyzing data to evaluate a variety of transportation options for seniors, people with disabilities, and low-income residents.

11. Engage local businesses to develop funding partnerships for transit services.

12. Support auto purchase and repair programs and driver’s license recovery programs directed at low-income workers who cannot use public transportation to get to jobs.

13. Provide transportation services for low-income and disabled job seekers enrolled in job skills training or transitional jobs programs.

14. Promote and expand childcare transportation services within the County to enable parents in low-income families to obtain and retain employment.

The small groups with participants from multiple counties were asked to use their previously created list of unmet transportation needs for the Region to guide the development of regional strategies, and then each group informed the remainder of the participants at the meeting of their suggested strategies. As each group presented, other participants were asked to indicate if their group had also identified that strategy by a show of hands. The following prioritized list of strategies summarizes the preferred strategies to address the Region’s unmet transportation needs.

**Strategies for Addressing Unmet Travel Needs between Counties**

1. Establish a regional transit authority with a dedicated funding source.

2. Encourage transit agencies to create memorandums of agreement or understanding that create transit connections between counties and establish procedures for funding these services. These agreements could also encourage municipalities not involved in providing transit to participate in these services and could create a coalition or task force that implements a partnership plan among transit providers. Local municipalities should research additional funding opportunities, such as private funding options, to increase transportation options for employment and medical trips.

3. Create a staffed call center for information about all public transit and human services transportation in the Region. This call center could be built from the existing Southeast Wisconsin Transit Systems marketing partnership. The call center could coordinate either a one-call, one-click service or a shared transportation website that would work in cooperation with the statewide 211 service to increase public awareness of these services. This call center could also provide a shared regional transportation database of available transportation options in which each county is responsible for maintaining and updating its information and for compiling data regarding transportation use and needs.
4. Until a regional transit authority is established, improve and strengthen services that cross county lines to increase transportation access to jobs, medical facilities, and other social and recreational activities. Develop new inter-county services connecting areas of high unemployment to large companies within the Region who are unable to meet their workforce needs. Encourage employers to offer transit passes or other benefits to their employees as an incentive for taking the inter-county transit services. Consider subsidizing extended service hours on existing taxi services to provide employment and medical trips. Encourage coordination between large employers and medical providers to better assess transportation needs of employees and patients. Encourage transit providers to serve more senior centers and nursing homes.

5. Purchase new accessible vehicles, vans, and buses for all transportation services, including Uber and Lyft.

6. In lieu of a regional transit authority, the State should develop rules, policies, and procedures to guide the development and operation of local transit systems. Legislation by the State should also encourage transit systems that serve multiple counties to collaborate on the identification and achievement of shared goals.

7. Increase funding for mobility managers to assist them in coordinating transportation services across county lines. Funded activities conducted by mobility managers could include coordinating community engagement in the transportation planning process, dispersing information on transit services to the public, and coordinating with local non-profit agencies to increase the number of volunteer driver programs in the Region. A liaison responsible for coordinating with all mobility managers in the Region should also be considered.

8. Establish consistent fare structures, eligibility requirements, and service hours for similar types of service in all counties. A standard fee structure should be considered for travel between counties. A regionally recognized transportation pass for transit dependent populations should be considered that is accepted by all transit providers. Consistent service hours should be established for transit providers that cross county lines. These efforts will increase clarity and understanding by the public concerning services and how to use them.

9. Increase non-urgent medical transportation options for individuals not eligible for Medicaid.

10. Increase the availability of demand response services outside of Milwaukee, Ozaukee, and Washington Counties.

VI. PLAN IMPLEMENTATION

Attendees of the Coordination Planning meeting were also asked to consider who should be responsible for implementing each of the identified strategies. Some of the potential responsible parties that the Milwaukee County participants identified are listed below.

**Milwaukee County**

- Milwaukee County would be responsible for improving the availability, convenience, safety, and security of the fixed-route and paratransit services offered by MCTS or the services provided by the Department on Aging.
- Milwaukee County would implement new routes or modify existing
routes to address gaps in transit service and areas not served by transit.

- A transportation coordinating committee could be established to guide the implementation of the proposed coordination strategies.

**Mobility Managers**

- The County’s mobility managers could facilitate the communication and coordination necessary to consider how transportation providers and agencies in Milwaukee County and the Region might share resources.
- The County’s mobility managers would coordinate with the community and other MCTS staff to identify changes to bus routes that address existing gaps in service.
- The County’s mobility managers would help develop a common eligibility determination for services or reciprocity agreement for transportation services both within Milwaukee County and between the County and surrounding counties.
- The County’s mobility managers would improve access to information on the available transportation services and continue work on a travel training program.

**All Transportation Providers**

- Transportation providers would improve access to information on the transportation services provided.
- Transportation providers would work to create new or expand upon partnerships that provide more transit options to underserved areas.

**All Parties**

- All interested parties, including the County and its municipalities, should advocate for increased transit funding, including additional State funding and the establishment of dedicated local funding for public transportation.
In addition to those listed below the County Executive, Chair of the County Board, Mayor, Village President, and Town Chair of each county and municipality in the Region were also invited to the meeting.

KENOSHA COUNTY

Bryan Albrecht ......................................................... President, Gateway Technical College
Doug Bartz ......................................................... Job Center Manager, Kenosha County Job Center
Ed Block ............................................................. Citizen

WELCOME AND INTRODUCTIONS

Mr. Muhs welcomed participants and asked attendees to introduce themselves and the agency they represented to their fellow attendees at their table. The participants had been assigned to one of sixteen small groups of six to eight people based on the primary county they served for the morning’s discussion on transportation within each of the seven counties. Each group had participants from public agencies and private organizations from within a specific county to focus on transportation needs within that county. Mr. Muhs then explained the agenda for the meeting:

1. Overview of the coordination process
2. Information on funding programs and opportunities
3. Small group discussions addressing travel within each county
4. Small group discussions addressing regional transportation
5. Discussion of the results of the small groups including the selection of regional prioritized strategies

OVERVIEW OF THE COORDINATION PROCESS

Mr. Muhs explained that the Coordination Plan is a framework for improving public transit and human services transportation in all seven counties and for the Region and includes strategies that are identified for addressing gaps between current services and needs. He described the Federal requirements for the coordination plans and for project funding. He also described the Wisconsin Department of Transportation (WisDOT) coordinated planning process, the role of the Commission within this process, and the need for a regional planning approach.

INFORMATION ON FUNDING PROGRAMS

Ms. Thompson, Specialized Transit Program Manager, and Mr. Hirshfeld, Public Transit Manager, outlined the various opportunities for funding assistance from the Federal and State governments for public and non-profit operators. They presented on the public transit funding programs and the grant programs for specialized transit managed by WisDOT. They described current funding opportunities available through the Federal Transit Administration’s Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) Program, the State of Wisconsin’s County Elderly and Disabled Transportation Assistance Program (s. 85.21, Wisconsin Statutes), the Tribal Transportation for Elders Program (s. 85.215, Wisconsin Statutes), and the Wisconsin Employment Transportation Assistance Program (WETAP). Ms. Thompson and Mr. Hirshfeld provided examples of projects for these programs and described program requirements and eligible recipients.

SMALL GROUP DISCUSSION ADDRESSING TRANSPORTATION WITHIN EACH COUNTY

Mr. Muhs described the discussion packet that assisted the small groups in their analysis of transportation services within each county. The small group discussion packet for each county contained an inventory of principal transportation providers within the county, including public, private, and non-profit providers of human services transportation and providers of
transit services for the general public. Each group reviewed the inventory for their county and noted any needed changes for Commission staff to include in the final coordination plans. Each group was then asked to assess the quality of existing transportation services within each county based on eight different service attributes, create a list of unmet needs for traveling within each county, and identify strategies to address those unmet needs. The small groups then prioritized the needs and strategies they previously identified based on importance. To assist with discussion and in developing needs and strategies, each packet included information regarding population growth within each county and changes in the number of residents and households falling in transit dependent population groups; maps of existing public transit and shared-ride taxi service areas overlaid onto population density, employment density, and major activity centers; and lists of previous unmet needs and strategies from the 2012 planning effort. The lists of unmet needs and strategies developed by each group were collected by Commission staff to assist with the development of the coordination plans.

SMALL GROUP DISCUSSION ADDRESSING REGIONAL TRANSPORTATION

Following the selection of prioritized strategies to address unmet needs for travel within each county, the participants were assigned to new small groups to discuss regional transportation. Each group was comprised of representatives from several counties to provide the widest perspective possible on existing services at each table. Mr. Muhs introduced the small group discussion packet that assisted groups in their analysis of transportation services that crossed county borders. Similar to the previous exercise, the attendees were asked to discuss existing regional transit services within their small groups and assess the quality of these services based on eight different service attributes. This assessment guided the groups as they created a list of unmet regional transportation needs and identified strategies to address their list of unmet needs. To assist with discussion and in developing the needs and strategies, information in each packet included an inventory of principal transportation providers that cross county borders, consisting of public, private, and non-profit providers of human services transportation and providers of transit services for the general public; a regional transit service map that displayed public transit and shared-ride taxi service areas; regional population trends and statistics on transit dependent population groups for the Region; and lists of previous unmet needs and strategies for the Region from the 2012 planning effort. The lists of regional unmet needs and strategies completed by each group were collected by Commission staff to assist with the development of the coordination plans.

DISCUSSION OF REGIONAL PRIORITIZED STRATEGIES

Following the completion of their packets by all of the small groups, each group was invited to select a member to discuss the group’s proposed strategies to address the unmet needs they identified. After each strategy was shared with the full group, each of the other small groups was asked to indicate if they had also identified that strategy by a show of hands. This process was intended to show the participants how regional strategies would be prioritized within the final document. Mr. Muhs indicated that this list of prioritized strategies and a summary of the key findings of the small group discussions would be included in the Public Transit-Human Services Transportation Coordination Plan for each county.
WRAP-UP

After the small group discussions, Mr. Muhs thanked all attendees for their participation and input into the development of the coordination plans. He informed the participants that a final plan for each county would be assembled by Commission staff based on the discussion and feedback from this meeting. He said it was anticipated that the finalized Public Transit-Human Services Transportation Coordination Plan for each county would be submitted to WisDOT and made available to those in attendance in early 2017.
