I. INTRODUCTION

The Public Transit – Human Services Transportation Coordination Plan for Washington County: 2016, hereafter referred to as the Coordination Plan, is intended to provide a framework to assist community leaders, human services agencies, and public transit agencies in improving public transit and human services transportation in Washington County and the County’s connections to the Southeastern Wisconsin Region. The Coordination Plan assesses the existing public transit and human services transportation services and needs in the County, identifies unmet needs or service gaps, and presents a prioritized list of strategies to address those needs. By focusing on coordination strategies that use existing resources, the Coordination Plan aims to improve the access of County residents to transportation in a cost-effective manner.

Federal and State Coordination Planning Requirements

The coordination planning process was first undertaken in 2008 in response to the Federal requirements in the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The Coordination Plan was renewed and updated in 2012 under the requirements of the Moving Ahead for Progress in the 21st Century Act (MAP-21), and has now been updated under the requirements of the Fixing America’s Surface Transportation Act (FAST Act). All three Federal transportation acts have required that a locally-developed public transit-human services coordination plan be developed every four years. The FAST Act mandates that projects selected for funding under the Enhanced Mobility of Seniors and Individuals with Disabilities program (Section 5310) be included in the coordinated planning process.

Under the provisions of the FAST Act, project eligibility for the Section 5310 program includes the purchase of specialized transit vehicles used to serve seniors and people with disabilities, mobility management, non-vehicle capital purchases, operating expenses for transportation projects that exceed the requirements of the Americans with Disabilities Act of 1990 (ADA), improving access to fixed route transit service to decrease reliance by people with disabilities on complementary paratransit, and providing alternatives to public transportation that assist seniors and people with disabilities. In addition, though not required by the FAST Act, the Wisconsin Department of Transportation utilizes the Coordination Plans to determine project eligibility for Wisconsin Employment Transportation Assistance Program (WETAP) funding.

Several agencies and organizations in Washington County have received funding under the Section 5310 and WETAP programs in the past. The Coordination Plan will help ensure the eligibility of current and future transit projects funded through those programs. The Coordination Plan includes the following elements required under Federal regulations.

- An assessment of transportation needs for seniors, people with disabilities, and people with low incomes;
- An assessment of available transportation services;
- Strategies to address the identified gaps between current services and needs, as well as opportunities to improve efficiencies in service delivery; and
- Priorities for implementing these strategies.
Role of the Southeastern Wisconsin Regional Planning Commission

The Commission staff, at the request of WisDOT, and with guidance and input from human services agencies and public and private transit operators in each county, has facilitated the planning process and prepared the maps, tables, and inventories for the Coordination Plans for each of the seven counties in the Region. For the Washington County Coordination Plan, Commission staff invited a wide range of stakeholders from Washington County and the Region to a meeting to identify the unmet transportation needs in the Region and in each of the seven counties, and develop strategies to address these needs. The invitation list, meeting record, and attendance list for this meeting are documented in Appendices A and B.

In addition to this Coordination Plan, the Commission also periodically prepares the long-range (20-35 year) transportation system plan for the seven-county Southeastern Wisconsin Region and short-range (5 year) transit development plans for each of the Region’s public transit systems. The year 2050 regional land use and transportation plan for Southeastern Wisconsin (VISION 2050), adopted in 2016, is intended to provide a vision for, and guide to, future transportation system development in the Region. The short-range transit service plans address current transit service issues and needs, and represent an initial stage of implementation of the recommendations of VISION 2050. A countywide public transit service plan for Washington County, prepared by the Commission in 1997, resulted in the creation of the Washington County Shared-Ride Taxi and the Washington County Commuter Express services. A new transit development plan was completed for the County in 2015 that evaluated existing transit services, developed service objectives and standards, proposed alternative service plans, and recommended a service alternative for the years 2015-2019.

II. TRANSPORTATION NEEDS OF SENIORS, PEOPLE WITH DISABILITIES, AND PEOPLE WITH LOW INCOMES

General Population Characteristics

Washington County is located in southeastern Wisconsin, bordered by Dodge County to the west, Fond du Lac and Sheboygan Counties to the north, Ozaukee County to the east, and Waukesha County to the south. Washington County’s population in 2015 was 133,700 persons, according to the U.S. Census Bureau. Of that total, the combined population of the Cities of West Bend and Hartford and the Village of Germantown made up 66,000 persons, or about 49 percent. In the rest of the County, small concentrations of population also exist in the Villages of Jackson, Kewaskum, and Slinger. Map 1 shows the population density in 2010 by U.S. Public Land Survey quarter-section.

Washington County’s population has grown rapidly since 1990. Between 2000 and 2015, the County’s population grew an additional 14 percent from approximately 117,500 to 133,700 persons, respectively. The rapid growth is expected to continue through 2030. As Figure 1 displays, the Washington County population is projected to reach 158,000 persons by the year 2030.

Transit-Dependent Population Characteristics

Certain segments of the population may be expected to have a greater dependence on, and make more extensive use of, public transit than the population as a whole because they have historically had more limited access to the automobile as a mode of travel than the population in general. Four such “transit-dependent” population groups were identified for this plan:

- Seniors (aged 75 and older),
- Persons in low-income households,
- People with disabilities, and
- Households with no vehicle available.

Table 1 displays the historic population of these groups in the study area in 2000, 2010, and 2015. The information in the table leads to the following observations:

- In 2015, persons in low-income households account for the largest share of the transit-dependent population in the County at about 16 percent of the total population. People with disabilities also make up a significant portion of the population at about 11 percent of the County’s residents. 7 percent of the population is at least 75 years of age, and about 4 percent of households have no vehicle available.
- Between 2000 and 2015, all four transit-dependent population groups increased in absolute numbers, while only zero-vehicle households’ share of all County households held constant.

Data from the 2011-2014 American Community Survey were used to identify areas in Washington County where transit needs are highest. Map 2 displays Census block groups within the County with the highest concentration of transit-dependent populations. These may be considered as potential priority areas for the provision of transit service.
In 2014, the residential concentrations of transit-dependent persons were located mostly within the Cities of Hartford and West Bend and the Villages of Germantown and Slinger. Transit needs in the rest of Washington County were low to moderate.

Employment Characteristics
Map 3 displays employment density in 2010 by U.S. Public Land Survey quarter-section. The highest employment concentrations in the County are in the Cities of Hartford and West Bend and the Villages of Germantown, Jackson, and Kewaskum.

Major Activity Centers
Transportation needs must also consider the local travel demand generated by major activity centers. Major activity centers can be land uses or facilities that currently attract, or have the potential to attract, significant total person or transit person trips. Eight types of major activity centers were considered for this Coordination Plan:

- Hospitals, Medical Centers, or Clinics with 10 or more physicians
- Job Resource Centers
- Major Commercial Areas (areas with more than 3,500 jobs in the office or service sectors, or more than 2,000 jobs in the retail trade sector)
- Major Employers with 100 or More Employees
- Major Institutions of Higher Education (the main campus of all traditional four-year colleges and universities, and the main location of public technical colleges)
- Nursing Homes
- Residential Facilities for Seniors, People with Disabilities, and Low-Income Households
- Senior Centers, Senior Meal Sites, and Adult Day Centers

*a An individual, such as someone who is a senior and lives in a low-income household, may be represented in more than one population group.

*b Includes persons residing in households with a total family income less than 200 percent of the Federal poverty level.

*c The definition of “people with disabilities” used by the U.S. Census Bureau for the 2000 census changed for the 2010 Census and 2015 American Community Survey (ACS). For the 2000 Census, “people with disabilities” included those persons age 16 and older having a physical, mental, or emotional condition that made it difficult to go outside the home to shop or visit a doctor’s office. For the 2010 Census and 2015 ACS, “people with disabilities” included those persons age 15 or older who had serious difficulty living independently or a serious sensory, cognitive, or ambulatory disability.

Transit Needs Index for Washington County: 2014

TRANSPORT NEEDS INDEX LEVEL

- LOW (4)
- MARGINAL (5 TO 8)
- MODERATE (9 TO 12)
- HIGH (13 TO 16)

TRANSIT SERVICE (2016)

- WALK DISTANCE FROM BUS ROUTES AND STOPS

NOTE: THE TRANSIT NEEDS INDEX IS CALCULATED BY RANKING CENSUS BLOCK GROUPS BASED ON THE DENSITY OF POPULATION OR HOUSEHOLDS WITHIN FOUR CATEGORIES: SENIORS (75 AND OLDER), PERSONS IN LOW-INCOME HOUSEHOLDS, PEOPLE WITH DISABILITIES, AND HOUSEHOLDS WITH NO VEHICLE AVAILABLE. EACH RANKED BLOCK GROUP IS ASSIGNED A SCORE FROM 1 TO 4, BASED ON THE QUARTILE THE BLOCK GROUP FALLS WITHIN FOR EACH CATEGORY, WITH A 1 FOR THE LOWEST DENSITIES AND A 4 FOR THE HIGHEST DENSITIES. THE TRANSIT NEEDS INDEX IS EQUAL TO THE SUM OF THE SCORES FOR ALL FOUR CATEGORIES.

III. CURRENT TRANSPORTATION SERVICES

Washington County is served by a number of transportation providers, ranging in size from the Washington County Shared-Ride Taxi, a demand response system providing service throughout the County, to volunteer organizations that serve individuals by providing rides in private automobiles.

Table 2 lists the major transportation providers currently serving Washington County, and identifies the type of service they provide, their service area, their hours of operation, and their funding sources in addition to passenger fares. The first section of the table lists the services that are available to the general public and the second section lists the services that are primarily aimed at serving special population groups, or “human services transportation.”

Transit Services for the General Public

The principal transit services for the general public provided in Washington County include:

- Washington County Commuter Express—operated by a private transit company, Go Riteway Transportation Group Inc., under contract with the County—is a publicly-funded bus service that serves Washington County residents commuting to jobs in Milwaukee County.

- Washington County Shared-Ride Taxi—operated by a private transit company, Specialized Transport Services, Inc., under contract with the County—is a publicly-funded shared-ride taxi service that provides transportation to the general public for travel in the County (except for travel within the Cities of Hartford and West Bend, which are served by the Hartford and West Bend taxi systems) or between the County and the northern portion of Menomonee Falls.

- Hartford City Taxi—operated by the City of Hartford Recreation Department—is a shared-ride taxi service that serves the City of Hartford and immediate environs as well as some trips into Dodge and Milwaukee Counties.

- West Bend Taxi—operated by a private transit company, F.D.S. Enterprises, Inc., under contract with the City of West Bend—is a publicly-funded shared-ride taxi service that serves the City of West Bend and immediate environs.

Human Services Transportation
Other transportation services in the County are primarily aimed at serving the human services transportation needs of special population groups, including seniors, people with disabilities, low-income persons, or veterans. Some of the major human services transportation providers include:

• Interfaith Caregivers of Washington County provides advance reservation, door-to-door and door-through-door service to seniors throughout Washington County and the surrounding counties.

• The Threshold, Inc. provides fixed-route, fixed-schedule door-to-door service for participants in the daily programs for seniors or people with disabilities.

• The remaining transportation services operated within the County are mostly private-for-profit services that focus on providing transportation for medical appointments within Washington County and to surrounding counties and transportation network companies such as Uber or Lyft that provide services for the general public.

IV. ASSESSMENT OF TRANSPORTATION SERVICES AND IDENTIFICATION OF UNMET TRANSPORTATION NEEDS

Although some transportation needs can be understood by examining how current transportation providers meet the needs identified in Census data, maps, and other sources of demographic data, many of the needs can only be understood through direct dialogue and communication from agencies and individuals that provide or rely on transportation services. A wide range of individuals and agencies with an interest in transportation in the Region and County were invited to participate in a meeting to assist in the development of the Coordination Plan (see Appendices A and B). At the meeting, Commission staff presented maps and data similar to those presented in the first three sections of this Coordination Plan. The meeting included participants from across the Region who were divided into sixteen small groups of six to eight people each. Groups were initially assigned so that participants sat at a table with other attendees from the same county. Participants were then assigned to a new group that had members from multiple counties in the Region.

The small groups went through an evaluation exercise in which they assessed how well current transportation services meet the need of residents to travel within Washington County. This evaluation of existing services was based on: area served; days and hours of operation; fares; eligibility requirements for the service; vehicle accessibility for wheelchairs; customer service; reservation wait time; and ease of finding information on services. Following this task, they were asked to use the results of their assessment to guide the development of a list of unmet transportation needs. A summary of the key findings of the assessment and the identification of unmet transportation needs for traveling within Washington County appears below in no particular order.

Unmet Needs for Travel within Washington County

• There is a need for mobility management within the County that would ensure efficient communication and education among transportation partners, transit users, and the communities for a better understanding of all specialized transportation services.

• There is a need for more accessible vehicles used by human services providers.
• There is a need to implement shuttle service from the City of Hartford to the Washington County Commuter Express stop at the Richfield Park-Ride Lot.

• There is a need to expand volunteer driver programs and to sustain volunteer recruitment to ensure drivers are available for reservations.

• There is a need for free or low cost transportation options for seniors and people with disabilities to reduce social isolation and to ensure their health and wellness.

• There is a need for a specialized fixed-route bus service in the City of West Bend that would primarily serve seniors and people with disabilities.

• Lack of specialized medical transportation from medical facilities to residences for patients in bariatric treatment services and for those in oversized and powered wheelchairs.

• Lack of adequate service hours for the Washington County Shared-Ride Taxi. For example, in the late evening patients at hospitals and clinics in the County are unable to use transit to return home, and second-shift workers are unable to use transit to travel to and from jobsites.

• Lack of understanding in the healthcare community about the service capabilities and limitations of the three public shared-ride taxi systems in the County.

• Lack of information regarding shared-ride taxi and specialized medical transportation services on general information numbers (such as 211), or centralized directory websites (such as Impact 2-1-1).

• Limited passenger travel training services for individuals to use the Washington County Commuter Express and the three shared-ride taxi services in the County.

• Lack of driver training to help shared-ride taxi and specialized medical transportation drivers properly escort passengers with disabilities and medical patients returning to their residences.

The meeting also addressed travel needs between the counties in the Region. For this discussion, the second set of small groups with participants from multiple counties performed a similar assessment of how well current regional services meet the needs of residents. Using the results of their assessments, the groups then created a list of unmet regional transportation needs. A summary of the key findings of the regional assessment and the identification of unmet regional transportation needs appears below in no particular order.

**Unmet Needs for Travel between Counties**

• Lack of a regional transit authority to provide and coordinate transit and paratransit services across county borders.

• Transportation Options
  o Limited transportation options between counties—especially for seniors, people with disabilities, low-income residents, and households with no vehicle available—for travel to jobs, medical facilities, veterans services, and social and recreational activities.
  o Need to enable more transportation services to provide inter-county and interstate transit options in the Region.
  o Lack of transportation services for travel from suburb to suburb.
• Coordination and Communication
  o Lack of coordination in the distribution of information related to existing services throughout the Region.
  o Lack of coordination between transit agencies on fares, service hours, and days of operation, which causes inconveniences for transit users.
  o Lack of coordination between paratransit services in the Region.
  o Lack of coordination among county leaders on providing public transit and human services transportation across the Region.
  o Lack of transit operations that provide bilingual services.
  o Need for identifying additional opportunities for gathering citizen input on regional transportation.
  o Need to include grassroots efforts in decision-making processes relating to transit communications that cross county lines.

• Transit and Job Access
  o Need to increase public transit and other transit services that connect workers to jobs between counties.
  o Need for job seekers to be informed about job-ride programs that would connect them to jobs in other counties.

• Convenience of Transit
  o Need to make transit services between counties more affordable by reducing fares.
  o Need to make transit services more convenient by increasing the frequency of transit services or reducing the amount of time needed for making reservations.
  o Lack of regional partnerships among healthcare providers to reduce fares for rides to medical facilities in the Region.
  o Lack of transit services during evening and weekend hours.
  o Need for all transportation services, including Uber and Lyft, to be accessible to people with disabilities.

• Additional Needs
  o There is a need to broaden the categories of individuals who are eligible to use human services transportation.
  o There is a need to remove stipulations that make it difficult for transit providers to obtain liability insurance for trips that cross county borders.
This Coordination Plan presents two types of strategies for Washington County to consider in addressing the identified transportation needs in the County. The first section is a list of Federal and State funding programs that support public transportation services. The second section includes strategies that were identified by participants at the meeting for the development of the Coordination Plan.

Financial Strategies: Federal and State Funding Programs
Descriptions of the Federal and State programs that provide financial assistance for public transportation services and which could be used in Washington County are illustrated in Tables 3 and 4. More information on Federal and State funding programs can be found on WisDOT’s website (http://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/transit/default.aspx). In addition to the Federal and State programs shown in Tables 3 and 4, which are aimed primarily at providing transportation services, various human-service funding programs and block grant programs can be used for transportation services.
Prioritized Strategies to Address Unmet Needs

Attendees of the Coordination Planning meeting were asked to develop strategies to address the unmet needs that they had already identified. At the meeting, Commission staff provided information on strategies proposed in the 2012 Coordination Plans to illustrate potential strategies to improve transportation service.

The small groups of participants from within the same county were asked to follow up their identification of unmet needs with a list of strategies to address those needs. That discussion resulted in the following prioritized list of strategies that the participants believed were appropriate for Washington County.

Strategies for Addressing Unmet Travel Needs within Washington County

1. Provide funding for a mobility manager position for Washington County whose duties could include, but are not limited to:
   a. Improving communication regarding public transit and human services providers in the County to potential users through printed and online directories of these transportation services. Examples could include a digital version of the annually-updated

“Transportation Service Directory for Washington and Ozaukee Counties” to provide to 211 and online service directories.

b. Promoting the availability of these services through improved outreach efforts and marketing programs.

c. Assisting in coordinating transportation services.

d. Gathering and analyzing data to evaluate a variety of transportation options for seniors, people with disabilities, and low-income residents.

2. Apply for Federal Section 5310 and Section 5339 funding for buses and other accessible vehicles that establish or expand the vehicle fleets of public transit and human services providers.

3. Establish or expand volunteer driver programs that connect residents to various destinations, particularly seniors to senior centers and health and wellness facilities. Volunteer driver programs should increase safety and convenience for people with disabilities and medical patients who are traveling between their residences and medical facilities. Residents should also be informed about these programs through marketing, outreach, and public education.

4. Work with WisDOT to fund a park-ride lot at STH 60 and USH 41 in the Village of Slinger to better serve customers of the Washington County Commuter Express bus service.

5. Establish a fixed route minibus service that connects seniors and people with disabilities to key destinations in the County.

6. Educate medical providers and facilities about the capabilities and limitations of the County, Hartford, and West Bend shared-ride taxi services to transport patients and people with disabilities. Develop a checklist for staff to determine if a ride request is appropriate to ensure proper utilization of public services without misuse.

7. Study need and locations for a southern transfer point between the Ozaukee County and Washington County shared-ride taxi services. Coordinate with Ozaukee County to identify a location and construct a shelter if needed.

8. Support auto purchase and repair programs and driver’s license recovery programs directed at low-income workers who cannot use public transportation to get to jobs, such as the Keys to Work Auto Loan Program sponsored by Waukesha-Ozaukee-Washington Workforce Development, Inc.

The small groups with participants from multiple counties were asked to use their previously created list of unmet transportation needs for the Region to guide the development of regional strategies, and then each group informed the remainder of the participants at the meeting of their suggested strategies. As each group presented, other participants were asked to indicate if their group had also identified that strategy by a show of hands. The following prioritized list of strategies summarizes the preferred strategies to address the Region’s unmet transportation needs.

**Strategies for Addressing Unmet Travel Needs between Counties**

1. Establish a regional transit authority with a dedicated funding source.

2. Encourage transit agencies to create memorandums of agreement or understanding that create transit connections between counties and establish procedures for funding these services. These
agreements could also encourage municipalities not involved in providing transit to participate in these services and could create a coalition or task force that implements a partnership plan among transit providers. Local municipalities should research additional funding opportunities, such as private funding options, to increase transportation options for employment and medical trips.

3. Create a staffed call center for information about all public transit and human services transportation in the Region. This call center could be built from the existing Southeast Wisconsin Transit Systems marketing partnership. The call center could coordinate either a one-call, one-click service or a shared transportation website that would work in cooperation with the statewide 211 service to increase public awareness of these services. This call center could also provide a shared regional transportation database of available transportation options in which each county is responsible for maintaining and updating its information and for compiling data regarding transportation use and needs.

4. Until a regional transit authority is established, improve and strengthen services that cross county lines to increase transportation access to jobs, medical facilities, and other social and recreational activities. Develop new inter-county services connecting areas of high unemployment to large companies within the Region who are unable to meet their workforce needs. Encourage employers to offer transit passes or other benefits to their employees as an incentive for taking the inter-county transit services. Consider subsidizing extended service hours on existing taxi services to provide employment and medical trips. Encourage coordination between large employers and medical providers to better assess transportation needs of employees and patients. Encourage transit providers to serve more senior centers and nursing homes.

5. Purchase new accessible vehicles, vans, and buses for all transportation services, including Uber and Lyft.

6. In lieu of a regional transit authority, the State should develop rules, policies, and procedures to guide the development and operation of local transit systems. Legislation by the State should also encourage transit systems that serve multiple counties to collaborate on the identification and achievement of shared goals.

7. Increase funding for mobility managers to assist them in coordinating transportation services across county lines. Funded activities conducted by mobility managers could include coordinating community engagement in the transportation planning process, dispersing information on transit services to the public, and coordinating with local non-profit agencies to increase the number of volunteer driver programs in the Region. A liaison responsible for coordinating with all mobility managers in the Region should also be considered.

8. Establish consistent fare structures, eligibility requirements, and service hours for similar types of service in all counties. A standard fee structure should be considered for travel between counties. A regionally recognized transportation pass for transit dependent populations should be considered that is accepted by all transit providers. Consistent service hours should be established for transit providers that cross county lines. These efforts will increase clarity and understanding by the public concerning services and how to use them.
9. Increase non-urgent medical transportation options for individuals not eligible for Medicaid.

10. Increase the availability of demand response services outside of Milwaukee, Ozaukee, and Washington Counties.

VI. PLAN IMPLEMENTATION

Attendees of the Coordination Planning meeting were also asked to consider who should be responsible for implementing each of the identified strategies. Some of the potential responsible parties that the Washington County participants identified are listed below.

Washington County

- Washington County would pursue funding for a mobility manager who would educate transportation partners, transit users, and medical providers about all specialized transportation services in the County.
- Washington County would be responsible for continuing to distribute a digital version of the Transportation Service Directory and for providing updated information to 211 on-service providers as it becomes available.
- Washington County would coordinate with WisDOT to construct a park-ride lot in the Village of Slinger.
- Washington County would coordinate with Ozaukee County to study and establish a southern shared-ride taxi transfer point if needed.
- Washington County would be responsible for expanding the service hours of the County’s Commuter Express and Shared-Ride Taxi services.
- Washington County should consider appointing a transportation coordinating committee that would study how to implement the identified coordination strategies and recommend actions to County officials.

All Transportation Providers

- Transportation providers would increase driver and passenger training programs to better serve passengers with disabilities and passengers who recently received medical treatment.
- Transportation providers would continue to purchase accessible vehicles as needed.
In addition to those listed below the County Executive, Chair of the County Board, Mayor, Village President, and Town Chair of each county and municipality in the Region were also invited to the meeting.

KENOSHA COUNTY

Bryan Albrecht ......................................................... President, Gateway Technical College
Doug Bartz ................................................................. Job Center Manager, Kenosha County Job Center
Ed Block ................................................................. Citizen
Starr Burke ............................................................... Mobility Manager, Kenosha County Aging and Disability Resource Center

WELCOME AND INTRODUCTIONS

Mr. Muhs welcomed participants and asked attendees to introduce themselves and the agency they represented to their fellow attendees at their table. The participants had been assigned to one of sixteen small groups of six to eight people based on the primary county they served for the morning’s discussion on transportation within each of the seven counties. Each group had participants from public agencies and private organizations from within a specific county to focus on transportation needs within that county. Mr. Muhs then explained the agenda for the meeting:

1. Overview of the coordination process
2. Information on funding programs and opportunities
3. Small group discussions addressing travel within each county
4. Small group discussions addressing regional transportation
5. Discussion of the results of the small groups including the selection of regional prioritized strategies

OVERVIEW OF THE COORDINATION PROCESS

Mr. Muhs explained that the Coordination Plan is a framework for improving public transit and human services transportation in all seven counties and for the Region and includes strategies that are identified for addressing gaps between current services and needs. He described the Federal requirements for the coordination plans and for project funding. He also described the Wisconsin Department of Transportation (WisDOT) coordinated planning process, the role of the Commission within this process, and the need for a regional planning approach.

INFORMATION ON FUNDING PROGRAMS

Ms. Thompson, Specialized Transit Program Manager, and Mr. Hirshfeld, Public Transit Manager, outlined the various opportunities for funding assistance from the Federal and State governments for public and non-profit operators. They presented on the public transit funding programs and the grant programs for specialized transit managed by WisDOT. They described current funding opportunities available through the Federal Transit Administration’s Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) Program, the State of Wisconsin’s County Elderly and Disabled Transportation Assistance Program (s. 85.21, Wisconsin Statutes), the Tribal Transportation for Elders Program (s. 85.215, Wisconsin Statutes), and the Wisconsin Employment Transportation Assistance Program (WETAP). Ms. Thompson and Mr. Hirshfeld provided examples of projects for these programs and described program requirements and eligible recipients.

SMALL GROUP DISCUSSION ADDRESSING TRANSPORTATION WITHIN EACH COUNTY

Mr. Muhs described the discussion packet that assisted the small groups in their analysis of transportation services within each county. The small group discussion packet for each county contained an inventory of principal transportation providers within the county, including public, private, and non-profit providers of human services transportation and providers of
transit services for the general public. Each group reviewed the inventory for their county and noted any needed changes for Commission staff to include in the final coordination plans. Each group was then asked to assess the quality of existing transportation services within each county based on eight different service attributes, create a list of unmet needs for traveling within each county, and identify strategies to address those unmet needs. The small groups then prioritized the needs and strategies they previously identified based on importance. To assist with discussion and in developing needs and strategies, each packet included information regarding population growth within each county and changes in the number of residents and households falling in transit dependent population groups; maps of existing public transit and shared-ride taxi service areas overlaid onto population density, employment density, and major activity centers; and lists of previous unmet needs and strategies from the 2012 planning effort. The lists of unmet needs and strategies developed by each group were collected by Commission staff to assist with the development of the coordination plans.

**SMALL GROUP DISCUSSION ADDRESSING REGIONAL TRANSPORTATION**

Following the selection of prioritized strategies to address unmet needs for travel within each county, the participants were assigned to new small groups to discuss regional transportation. Each group was comprised of representatives from several counties to provide the widest perspective possible on existing services at each table. Mr. Muhs introduced the small group discussion packet that assisted groups in their analysis of transportation services that crossed county borders. Similar to the previous exercise, the attendees were asked to discuss existing regional transit services within their small groups and assess the quality of these services based on eight different service attributes. This assessment guided the groups as they created a list of unmet regional transportation needs and identified strategies to address their list of unmet needs. To assist with discussion and in developing the needs and strategies, information in each packet included an inventory of principal transportation providers that cross county borders, consisting of public, private, and non-profit providers of human services transportation and providers of transit services for the general public; a regional transit service map that displayed public transit and shared-ride taxi service areas; regional population trends and statistics on transit dependent population groups for the Region; and lists of previous unmet needs and strategies for the Region from the 2012 planning effort. The lists of regional unmet needs and strategies completed by each group were collected by Commission staff to assist with the development of the coordination plans.

**DISCUSSION OF REGIONAL PRIORITIZED STRATEGIES**

Following the completion of their packets by all of the small groups, each group was invited to select a member to discuss the group’s proposed strategies to address the unmet needs they identified. After each strategy was shared with the full group, each of the other small groups was asked to indicate if they had also identified that strategy by a show of hands. This process was intended to show the participants how regional strategies would be prioritized within the final document. Mr. Muhs indicated that this list of prioritized strategies and a summary of the key findings of the small group discussions would be included in the Public Transit-Human Services Transportation Coordination Plan for each county.
WRAP-UP

After the small group discussions, Mr. Muhs thanked all attendees for their participation and input into the development of the coordination plans. He informed the participants that a final plan for each county would be assembled by Commission staff based on the discussion and feedback from this meeting. He said it was anticipated that the finalized Public Transit-Human Services Transportation Coordination Plan for each county would be submitted to WisDOT and made available to those in attendance in early 2017.
