SEWRPC STAFF MEMORANDUM

RESPONSE TO REQUEST BY THE CITY OF MUSKEGO TO AMEND THE MUSKEGO SANITARY SEWER SERVICE AREA

INTRODUCTION AND BACKGROUND

By letter dated October 15, 2008, the City of Muskego requested that the Southeastern Wisconsin Regional Planning Commission amend the City of Muskego sanitary sewer service area tributary to the Milwaukee Metropolitan Sewerage District as that area is currently documented in SEWRPC Community Assistance Planning Report No. 64 (3rd Edition), *Sanitary Sewer Service Area for the City of Muskego, Waukesha County, Wisconsin*, dated December 1997, as amended. The basic purpose of the amendment would be to include within the planned sewer service area certain lands located immediately adjacent to, but outside, the currently adopted sewer service area.

AREA DESCRIPTION

The area proposed to be added to the Muskego sanitary sewer service area encompasses 122 acres located west of North Cape Road in U.S. Public Land Survey Section 24, Township 5 North, Range 20 East, in the City of Muskego (see Map 1). The subject area is comprised of nine acres of existing urban development, including five existing homes; 72 acres of agricultural land; and 41 acres of environmentally significant land. The environmentally significant lands include about 40 acres of isolated natural resource area and about one acre of small wetlands less than five acres in size. The developable portion of the subject area is anticipated to be developed for residential use, accommodating an estimated future population of about 150 persons.

A more detailed delineation of the revised sewer service area and of the environmentally significant lands within is shown on the aerial photograph reproduced as Map 2. The environmentally significant lands shown on Map 2 have been revised to reflect the most recent available natural resource base information.

RELATIONSHIP OF THE PROPOSED CHANGE TO THE EXISTING SANITARY SEWER SERVICE AREA

The proposed addition of 122 acres to the Muskego sanitary sewer service area represents an increase in the planned sanitary sewer service area of about 1 percent and would result in an approximately 1 percent increase in the population of the sewer service area.

WATER QUALITY IMPACTS

Under the adopted regional water quality management plan, including the Muskego sanitary sewer service area plan, it is envisioned that all new urban development within the planned sewer service area would receive sanitary sewer service. In addition, the provision of public sanitary sewer service to those lands within the planned sanitary sewer service area that are currently developed and served by onsite sewage disposal systems may be expected to reduce the pollutant loadings from the existing onsite sewage disposal systems to both surface and ground waters. Assuming that all applicable Federal, State, and local permits are obtained and that proper site development and construction practices are employed, there should be no significant adverse water quality impacts attributable to the development of the planned sanitary sewer service area.

SEWERAGE SYSTEM CAPACITY IMPACTS

The size and capacity of the MMSD sewage conveyance and treatment facilities are set forth in the District's facility plan completed in 2007.¹ That facility plan is based upon a planned Muskego-MMSD sewer service area resident population level of 34,100. In addition to the estimated per capita contribution allowance for residential development, a separate allocation was developed for sewage loadings from commercial and industrial lands. The year 2000 population of the Muskego-MMSD sanitary sewer service area was about 20,000 persons. The proposed addition to the sewer service area would add a population of about 160 persons, including existing residents. Thus, there is planned capacity available for the areas proposed to be added to the sewer service area.

PUBLIC REACTION TO THE PLAN AMENDMENT

A public hearing was held on January 27, 2009, at the Muskego City Hall to receive public comment on, and reaction to, the proposed sewer service area amendment. The hearing was sponsored by the City of Muskego and the Regional Planning Commission. A summary of the plan amendment was presented prior to receiving public comment, including a description of the lands proposed to be added to the sewer service area and any environmentally significant lands located within.

No objections to the proposed amendment were expressed at the hearing. Accordingly, no changes were made to the proposed plan amendment as presented at the public hearing.

LOCAL GOVERNMENT SUPPORT FOR THE PLAN AMENDMENT

The Common Council of the City of Muskego adopted the plan amendment on January 27, 2009.

CONCLUDING RECOMMENDATION

Based upon the foregoing, it is recommended that the Southeastern Wisconsin Regional Planning Commission formally amend the City of Muskego sanitary sewer service area as documented in SEWRPC Community Assistance Planning Report No. 64, (3rd Edition), as amended, in the manner shown on Map 1.
