WisDOT Transmittal of Projects for Inclusion in TIP by State and Local Governments

*State and local government budgets identify levels of funding for specific programs, and typically also identify specific projects. While the TIP covers a four year period, the State budget is only for a two year period and local budgets are for one year. Generally, the levels of funding provided in State and local budgets are anticipated to extend through the TIP four year time frame. State and local multi-year capital improvement programs also provide guidance on potential budgets and identify projects over the TIP four year period.

*For some categories of funding, such as Federal Highway Administration (FHWA) Surface Transportation Program - Other (STP-O) and National Highway Performance Program (NHPP) funding and State funding, WisDOT selects projects for funding in addition to those identified in the State budget.

*For some categories of funding, a competitive project selection process selects projects for funding, including at the State level for FHWA Transportation Alternatives Program and FHWA Safety funding, at the urbanized area level for STP-urbanized Area funding, and at the county level for Bridge funding. The projects are typically selected for a multi-year period which extends to or beyond the TIP four year period. Listed below for each category of Federal transportation funding is the level at which project selection processes are conducted:
